

NRR 26
IPIL 37.3/44/42

Ideal for:

Recreational shooting
Clay target
Wingshooting
Game hunting

Competition shooting
Large caliber firearms
Windy shooting conditions

Includes Shooter's Accessory Kit:

- Monitor Vault high-impact carrying case
- Cleaning cloth
- 6 Zinc Air 312 batteries
- Oto-Ease lubricant
- Oto-Clens cleaning solution
- Battery tool / cleaning loop
- DefendEar patch
- Instructional DVD

DefendEar Digital Hunter

The Digital Hunter offers two DSP programs user selectable by pressing a button at the top of the digital module.

- **NORMAL MODE** gunshot noise suppression and ambient sound amplification for communication and environmental awareness.
- **WIND REDUCTION MODE** increases the amount of wind noise suppression—ideal for open field hunting and other severe conditions. The DefendEar Digital Hunter has an NRR of 26.

Technology:

- **Westone Custom Fit**
50+ years of expertise making custom products for the ear.
- **Medical Grade OtoBlast Silicone***
Custom earpieces are formulated to optimize biocompatibility, attenuation, comfort, fit, and durability.
- **Modular Design**
DefendEar Digital field-removable electronics allow for easy cleaning, service repairs, or future upgrades.
- **Advanced DSP (Digital Signal Processing)**
Exceptionally accurate and lightning fast, DefendEar Digital's active, digital circuitry delivers unsurpassed amplification for situational awareness and appropriate noise attenuation when you pull the trigger. Features include:
 - Digital Compression and Signal Processing Circuit
 - Volume Control
 - Low Battery Warning
- **Slick-Sil AM™**
A chemically bonded coating for silicone earpieces is proven to be 99.99% effective against bacteria, germs, and other pathogens.
- **Multiple Color Options**
A wide range of colors are available from discrete skin tones to high-visibility colors as well as several combinations to meet unique personal taste or application requirements.

Battery life: approximately 150 hours.

*Westone OtoBlast material compatibility tested according to MIL-STD-810F by an independent NIST-NVLAP / OSHA NRTL / DSCC / NCC CB / A2LA accredited laboratory.

OtoBlast has passed testing according to ISO Standard 10993: Biological Evaluation of Medical Devices Part 10, Tests for Irritation & Delayed Hypersensitivity Biological Evaluation of Medical Devices Part 5, Tests for In Vitro Cytotoxicity
